

PACIFICTECH eINVOICES FOR SAGE INTACCT MAKES THE EXCHANGING OF INVOICES BETWEEN BUSINESSES MORE EFFICIENT, REDUCES ERRORS, SIGNIFICANTLY LOWERS ADMINISTRATIVE COSTS AND MOST SIGNIFICANTLY - IS MORE SECURE REDUCING THE RISK OF FRAUD.

eInvoicing is the process of exchanging invoice documents between businesses in a standardised digital format. Providing functionality similar to EDI solutions, it allows systems to ‘speak’ to each other, even if only one of the businesses are using the Sage Intacct ERP system.

eInvoicing via the PEPPOL network enhances security through encrypted data transmission, reducing the risk of fraud and unauthorised invoices. It ensures authenticity and integrity of invoices with digital signatures and secure archiving. Additionally, automated processes minimise human error, safeguarding sensitive financial information. Compliance with regulatory standards further strengthens the security framework, providing businesses with a reliable and protected invoicing system.

Sending eInvoices

Pacifictch Sending of eInvoices is for both Order Entry and Accounts Receivable invoices as well as credit notes. It facilitates streamlining of operations so organisations can leverage multiple invoice channels to deliver invoices to the buyers’ ERP systems.

Main Features

- » Tightly integrated into Sage Intacct
- » Meets government mandated eInvoicing requirements
- » Meets archiving requirements, such as audit and legibility, for local and cross-border/global invoicing
- » Secure Data - Transactional data stored within Sage Intacct system
- » Developed using the Sage Intacct API so it is easy to use and requires minimal training

We have been included in the eInvoicing ready product register by the [ATO](#)

We have been vetted by the New Zealand [MBIE](#)

Receiving eInvoices

With Pacifictch's eInvoicing there are 3 options to receive eInvoices:

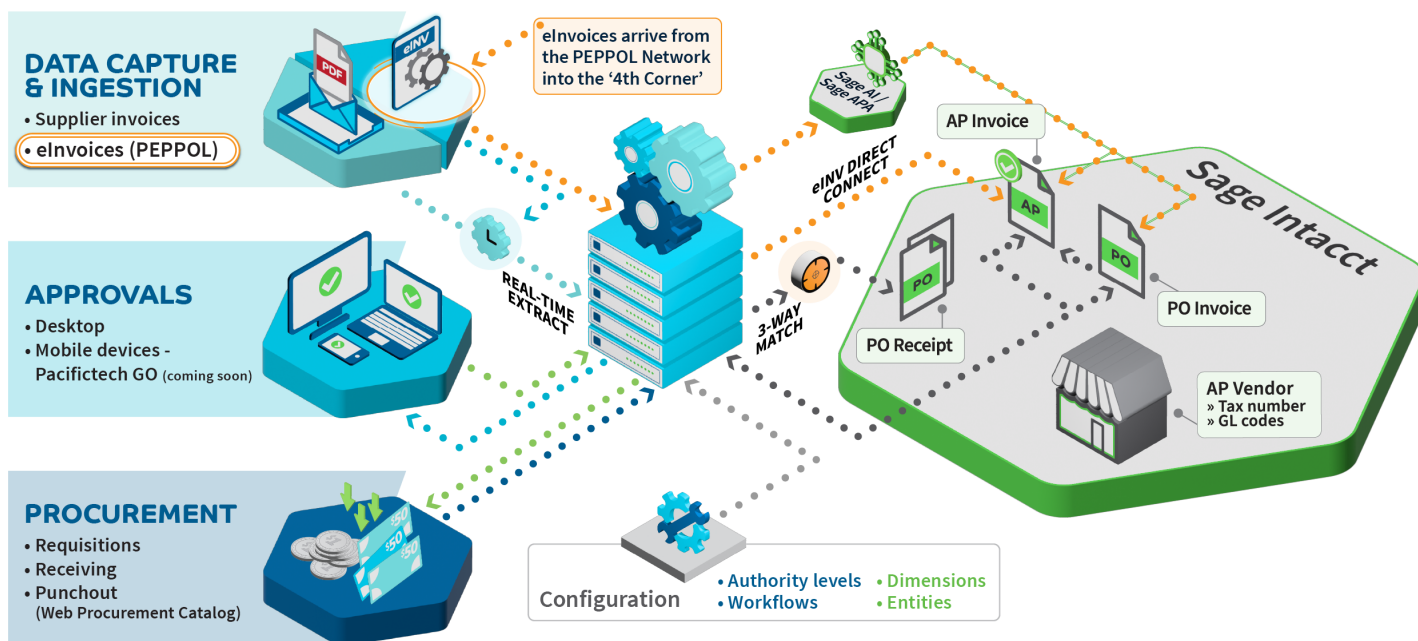

Option 1 | Direct Connect: The eInvoice arrives from the PEPPOL network to the Pacifictch servers ("Corner 4"), then gets inserted directly into Intacct's AP module as a draft invoice.

Option 2 | Via the Sage AI/AP Automation: The eInvoice arrives from the PEPPOL network to the Pacifictch servers ("Corner 4"), then gets inserted directly into Intacct's AP or PO module as a draft invoice.

Option 2 | Via Pacifictch AP Automation: The eInvoice arrives from the PEPPOL network to the Pacifictch servers ("Corner 4"), then gets inserted into the Pacifictch AP Automation. This option is applicable for organisations that require more sophisticated workflow functionality than what Intacct provides.

SYSTEM REQUIREMENTS

- An Intacct subscription
- Reliable internet
- Supports all modern web browsers
- The DPS Web Service must be accessible to the Pacifictch Web Infrastructure via the Internet.
- A document covering security information is available upon request

BENEFITS & REWARDS

Direct and secure. eInvoices are impossible to lose, cannot be delivered to the wrong person, cannot be intercepted or be processed incorrectly. It minimises the risk of fake or compromised invoices. Sender and receiver details are validated, audit logs kept, and strict protocols followed to ensure invoices remain secure.

Reduced Admin. eInvoicing saves time by not having to re-key or scan invoices, make corrections, or chase missing information. While you still need to apply your normal approval process before paying invoices, spending less time on admin allows greater focus on growing your business.

Reduced Time. eInvoices are processed faster than you think. An e-invoice reaches the right person within minutes - with minimal intervention the invoice can be directly processed within the administration software.

Improved financial visibility. Real-time insight into your company's finances, invoices can be processed directly in the accounting software enabling real-time cost savings. eInvoicing can save around 62% of companies and organisations on mail attachments. Calculating into averages - with shipping, material, and handling costs, due to time saved by reducing manual handling, eInvoicing can save around \$1.65 per invoice.

Faster payment. It takes on average 25.1 days for a small business to be paid. By reducing manual processing, the potential for errors and delays, eInvoicing speeds up payment and improves cash flow.
