

EXTEND THE POWER OF YOUR SAGE 300 PACIFICTECH WORKFLOW SUITE BEYOND THE FINANCE TEAM. USERS CAN CREATE PURCHASING AND OTHER TRANSACTIONS, AND REVIEW APPROVALS SECURELY FROM ANY WEB BROWSER, GIVING EMPLOYEES THE FLEXIBILITY TO WORK FROM ANYWHERE WITHOUT REQUIRING THE SAGE DESKTOP CLIENT.

Sage 300

As PW-Web is part of Pacifictch Connected Services, customers can continue running their existing Sage 300 on-premise solution while extending secure, browser-based access to employees across their organisation. It's a simple, scalable way to empower large numbers of non-financial users without changing the existing ERP environment.

Web Transaction Entry

Purchasing Transactions, Internal Issues, Invoices can now be created with just a Web Browser and access to the Internet. The Web transaction interface is easy to use which makes the requisitioning process simple for non-financial users.

This service is especially useful where a large number of non-financial users exist, where technical barriers exist to deliver Sage 300, or where the organisations users are frequently mobile yet need to create transactions remotely.

Web Approvals

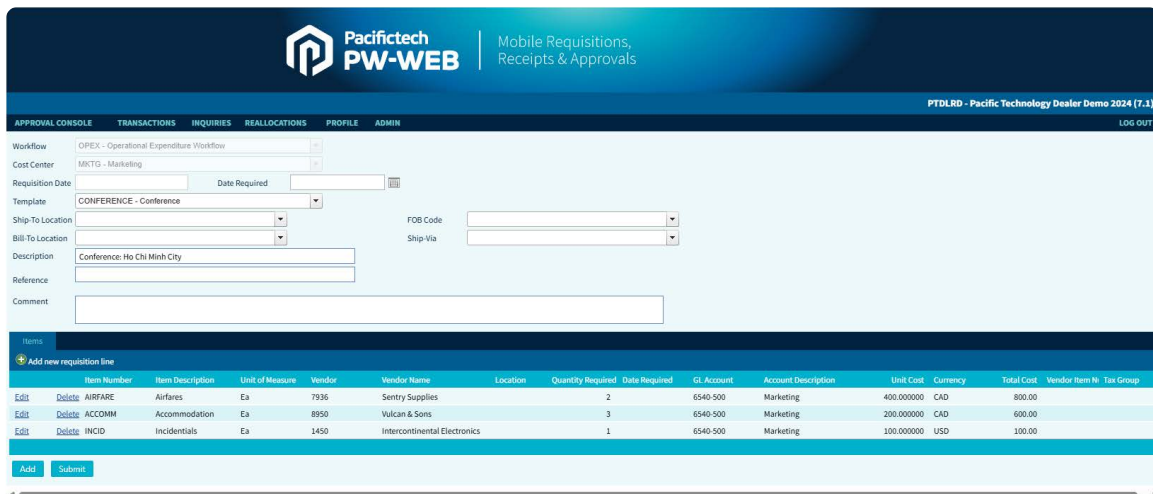

Senior staff and executives who are required to perform an essential step in the workflow process by approving (or declining) transactions can now do so using the Web Approval.

The Pacifictch Workflow suite can be configured to send out Approval Notifications via email with a hyperlink directly to launch the specific Web Approval.

Funds Availability (the ability to look-up budget status and review other requisitions and PO commitments contending for budget), and the ability to access any attached Workflow Documents are two important features of this solution that assist the approval decision makers.

Main Features

- » Mobility - Approvals actioned from mobile devices
- » Strong security - no transaction data stored outside of Sage 300
- » Includes PunchOut - Web Procurement Catalog
- » Allows users to perform their duties without needing access to the core Sage 300 solution
- » Easy to deploy and use
- » More Secure as data stays in Sage 300

The screenshot displays the Pacifictch PW-WEB interface for Mobile Requisitions, Receipts & Approvals. The top navigation bar includes links for APPROVAL CONSOLE, TRANSACTIONS, INQUIRIES, REALLOCATIONS, PROFILE, and ADMIN. The main form area contains fields for Workflow (OPEX - Operational Expenditure Workflow), Cost Center (MKTG - Marketing), Requisition Date, Date Required, Template (CONFERENCE - Conference), Ship-To Location, Bill-To Location, Description (Conference: Ho Chi Minh City), Reference, and Comment. Below the form is a table with the following data:

Item #	Item Number	Item Description	Unit of Measure	Vendor	Vendor Name	Location	Quantity Required	Date Required	GL Account	Account Description	Unit Cost	Currency	Total Cost	Vendor Item N°	Tax Group
1	7935	Airfares	Ea	7935	Sentry Supplies		2		6540-500	Marketing	400.000000	CAD	800.00		
2	8950	Accommodation	Ea	8950	Vulcan & Sons		3		6540-500	Marketing	200.000000	CAD	600.00		
3	1450	Incidentals	Ea	1450	Intercontinental Electronics		1		6540-500	Marketing	100.000000	USD	100.00		

At the bottom of the table, there are 'Add' and 'Submit' buttons.

Web Inquiries

Access real-time inquiries for requisitions, purchase orders, invoices, and Funds Availability.

Supports substitutions

The substitution facility allows users to nominate another user to carry out their approvals while they are on leave. This is date based and resets back to the original approver once they return to work.

Integrates seamlessly with the Pacifitech GO App for smartphone approvals

For the travelling executive, the Web approvals can be accessed from a smartphone browser. This capability can significantly improve the workflow completion performance. The Pacifitech GO App allows you to process these approvals seamlessly.

Benefits

- ✓ Keeps the users out of the ERP
- ✓ High availability
 - » Multiple web servers (redundancy)
 - » Proactive server monitoring
- ✓ Reduces LanPak licensing requirements
- ✓ Enhanced security
 - » Enterprise-grade security architecture
 - » No transactional data stored outside Sage 300
 - » **ISO 27001 certified**

Sage 300

**SAGE 300 + PURCHASING
WORKFLOW ON-PREMISE
IMPLEMENTATION**

SYSTEM REQUIREMENTS

- The on-premise installation must be operating Sage 300 with one of the Pacifitech workflow products having been implemented.
- The PW-Web Web Service must be accessible to the Pacifitech Web
- IA document covering security information is available upon request.
- Browser Support: All modern browsers

Pacifitech PunchOut - Web Procurement Catalog

A PunchOut catalog is a catalog that resides on a supplier's e-commerce site but is viewable by customers who are using their own company's procurement applications to make purchases – in this case Pacifitech's PW-Web.

The technology used redirects buyers from their procurement app to the supplier's website. From the supplier's site, customers can search for, compare, and select what they want to buy before returning their shopping cart items to PW-Web for approval and creation of the purchase order.

With the PunchOut, you can customize shopping experiences for staff to view the supplier's latest catalogs in real-time.

Sage Tech Partner

As a Sage Intacct Market Place Partner, Pacifitech develops innovative solutions that empower Sage Intacct users with smarter, more connected business processes. Pacifitech has a long and successful history as a Sage Tech Partner, delivering Sage 300 solutions that extend functionality and enhance business capability.
