

Pacifictch FUNDS AVAILABILITY

FUNDS AVAILABILITY ADDS REAL-TIME BUDGET CHECKING AND BUDGET OVERRIDE FUNCTIONS TO PURCHASING WORKFLOW, THESE EXTENSIONS PROVIDE THE SOPHISTICATED TOOLS TO ORGANIZATIONS WHERE BUDGETARY MANAGEMENT IS A CRITICAL ELEMENT OF THE PROCUREMENT PROCESS.

Sage 300

Funds Availability extends the Purchasing Workflow module to provide organizations with greater sophistication in managing the procurement process within strict budgetary controls.

Funds Availability operates in both the GL & PJC context.

Budget Management

To enable managers to make informed approval decisions, Funds Availability includes a powerful User Interface that provides a view of funds availability at a cost centre level.

The Funds Availability interface allows drill-down to source documents that comprise the actual values, as well as to documents traversing Sage 300 that are not yet in the GL actuals.

This interface also provides management with an important facility to review budget consumption throughout a period before budgetary limits are reached or exceeded.

Extended Workflow Features

Funds Availability adds new logical workflow rules to the Workflow Engine:

- » Check GL Funds Availability
- » Check Cost Centre Funds Availability
- » Check PJC Contract Value or Quantity
- » Check PJC Project Value or Quantity
- » Check PJC Category Value or Quantity

The funds availability tests are calculated by deducting the actual values, commitments and other unapproved document values from the budget value (which includes any budget transfers).

The test for GL funds availability will resolve and check each GL account present in the requisition document.

Evaluating Funds Availability at the Cost Centre level totals all GL accounts that belong to the Cost Centre; this allows budgetary flexibility for individual accounts as the cost centre as a whole is tested.

Based on the results of funds availability comparisons, approvals & notifications can be issued to managers with budgetary responsibility for a cost centre.

Funds Availability Transfers

Managers of Cost Centers have the ability to create Funds Availability Transfers, auditable transactions outside GL budgets that reallocate budget values between GL accounts and periods.

Funds Availability Transfers assist where extraordinary transactions require operational budget reallocations. The workflow engine take into account transfer values - as a result budget exceptions are determined from the adjusted budget values

Authorization Levels

Funds Availability provides the additional structures to Purchasing Workflow authorization levels, providing budget overrun value limits that each authorization level is capable of approving.

Based on the configuration of the workflow authority levels, the workflow engine will escalate the source document to the appropriate person with budget override authority.

Only once this override approval is granted can the source document continue to proceed through the workflow.

The screenshot shows the 'PTDLRD - FA Funds Availability' window. On the left is a tree view of cost centers under 'Information Technology'. The main area displays a 'Funds Availability Analysis' table with columns for 'Value' and 'Balance'. Below this is a table of transactions with columns for 'Document', 'Date', 'Vendor', 'Value', 'Status', and 'Workflow'.

Funds Availability Analysis		Value	Balance
GL Actuals		0.00	60,000.00
Unposted GL Transactions		0.00	60,000.00
Unposted AP Transactions		0.00	60,000.00
Unposted PO Transactions		0.00	60,000.00
Commitments		0.00	60,000.00
Available To Spend			60,000.00
Unapproved		588.31	59,411.68

Document	Date	Vendor	Value	Status	Workflow
RQN0000005	14/03/2019		190.800	Unapproved PR	SIMPLE
RQN0000007	14/03/2019		397.514	Unapproved PR	SIMPLE

AVAILABILITY & SYSTEM REQUIREMENTS

300 Editions:

Standard, Advanced and Premium

Databases:

Microsoft SQL Server

Languages:

English, Spanish, French, Simplified Chinese

Required Modules:

- + GENERAL LEDGER
- + PURCHASE ORDERS
- + PURCHASING WORKFLOW (PACIFITECH)

Integrated Modules (Optional):

- + PROJECT & JOB COSTING
- + INTERNAL ISSUES (PACIFITECH)

Pacifitech has a long and successful history as a Sage ISV Development Partner, developing Sage 300 solutions that enhance the functionality and capability of Sage 300.

Pacifitech is a Sage Intacct MPP and is developing innovative solutions for Sage Intacct.

Visit our website www.pacifitechsol.com for further information on products and services that Pacifitech provides to the Sage communities around the world.
